

The Forecast Variability update contains ERCOT's assessment of the potential for load, wind, and solar conditions to vary between forecasts. It is posted daily, focusing on the conditions three days out.

Updated October 21, 2021

Sunday: The overnight wind Saturday into Sunday looks overstated and has a moderate amount of variability. After 11:00 the variability decreases for the wind. Solar and load have normal to low variability.

10/24/2021	Forecast Variability			
	Load Forecast	Wind	Solar	Net Load
On Peak	Low	Low	Low	Low
Off Peak	Low	Medium	Low	Low
